

Trixi® Sunshine in the Blue

TRIXI® – EASY GOING IN 2022.

With these new Trixi® combinations, we have paid particular attention to the highly topical issues of drought tolerance, heat resistance and insect-friendliness. They can thus be excellently integrated into the corresponding marketing concepts.

Like all Trixi® combinations, these new introductions have been successfully tested. They meet the highest requirements for storability and transportability and stand out thanks to their high durability and excellent flowering properties.
